HUNGARIAN PRODUCTION OF ELECTRIC METERS, ELECTRONIC TESTING INSTRUMENTS

FLAN TO DOUBLE ELECTRIC METER OUTPUT -- Innsbruck, Unio Press Service, 21 Oct 52

The Ganz Arammerogyar (Ganz Electric Meter Factory), which is located at Godollo in the park opposite the royal palace, employs 2,800 workers. During 1951 its output exceeded the combined output of the three older plants at which electric meters are produced.

Personnel at the Arammerogyar consists of the most skilled workers and engineers previously employed by the Ganz Vagongyar (Ganz Railroad Car Factory.)

To accelerate production, Soviet automatic infrared drying kilns have been installed, as well as special equipment from Czechoslovakia.

Forty percent of total output is to be exported to the People's Republic of China, while 30 percent goes to the USSR.

Output is to be doubled in 1953.

MAKE ELECTRONIC TESTING INSTRUMENTS -- Budapest, Szabad Nep, 9 Jan 53

The products of the Elektronikus Merokeszulekek Gyara (Electronic Testing Instruments Plant) are used to test the quality and accuracy of all types of signal installations, such as radio receivers and transmitters and telephone and telegraph switchboards.

The appliances are also used by the high-voltage electrical industry, the textile, printing, and chemical industries, and the various research institutes.
